TODO note: change references link and MPN for all resistor and capa

TODO note:

U11.4 : SW – Switch node. Do not place any external component on this pin or connect this pin to any signal.
U11.5 : DNC – Do not connect. Do not connect this pin to ground, to another pin, or to any other voltage. This pin is connected to the internal bootstrap capacitor. This pin must be soldered to an isolated pad.
U11.3, U11.6, U11.13 : NC – these pins to the PGND plane can help enhance shielding and thermal performance.
U11.12 : PGOOD – A 10–kohm to 100–kohm pullup resistor is required and can be tied to the V5V pin or other DC voltage less than 18V.

R48 = 10kohm (recommended)
R50 = 2.49kohm (R50 = R48 / (5V – 1))

Cin > 9.4uF
C56 + C57 + C58 = (10uF + 10uF + 100nF) rated @ 75V.

Cout > 15uF (according figure 7–2 in datasheet SLVSG72 / TPSM560R6H)
C59 = 22uF/25V
